***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 43-53 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/70294 A2 (WO'294).

WO'294 discloses multiple coatings of substrates comprising metallic stents (See Abstract; page 11, paragraphs 2-3) . Metals may be deposited either by electrodeposition or by an electroless process (see page 4, paragraphs 2-3). Metals for electrodeposition of radioactive metal coatings include nickel, copper, chromium, cobalt, platinum, palladium, gold or silver. Radioisotopes (biologically active substance) are included (see page 47, last paragraph). The embodiment having the radiopaque material in the op layer is listed at page 11, second paragraph. This also includes an "activation layer" (top layer) over the radioactive coating. Non-metallic material is more radiopaque so that this feature is inherent to the materials selected as a therapeutic material. The same materials are used for this activation layer and include metals and polymers. The instant claims are anticipated by WO'294.

Claim 54 is objected to as dependent upon a rejected base claim.
